Hello there 👋

I'm Rijul—a self taught UX/UI Designer based out of Mumbai. For the past year I have been working as a freelance designer. I have collaborated with businesses around the world on apps and websites.

PROJECT I HAVE WORKED ON

Reco
DEC 20, 2020–JAN 13, 2021

Reco is a category defining tool, combining the power of video with developer tools. I helped them built the website, and define a visual direction for their brand.

Gloom
FEB 18–MAR 12, 2021

Gloom invests in eCommerce startups, and also helps them grow. I helped Gloom build a shiny new website to attract up and coming e-commerce businesses.

No Bark
MAR 06–JUN 08, 2021

No Bark is an online store helping you accessorise your dog with vests, collars and other stuff. I created an eCommerce store for them to do just that.

TOOLS THAT I USE

Figma

Webflow

VS Code

Sketch

Photoshop

Dood app
MAY 28–AUG 29, 2021

A mobile app for gamers and artists to share their content live, connect with their fans and collaborate with other artists.

Woodstone
SEP 18–OCT 21, 2021

Woodstone helps the elderly get life care plans when they need them the most. I created a website that would spark empathy and help them onboard more customers.
